

# Louvre Museum

Paris, France

## Reorganization Plan

When the French Ministry of Culture announced that the Ministry of Finance would be vacating the entire Rivoli Wing of the Louvre Palace, thus allowing the museum to gain some 500,000 sq.ft. of additional space, we were retained to prepare a conceptual plan for a complete reorganization of the Museum. Based on the results of our plan, the Louvre was able to subsequently build the famous glass pyramid addition to the original palace.
