

Desert Space Station

Amargosa Valley, Nevada

Design Architect for new building

Located in Amargosa Valley in southern Nevada, the Desert Space Station focuses on science and technology. The program includes 30,000 sq.ft. of exhibit space, a 250-seat 3D IMAX Theater, a Digistar Theater/Planetarium, an interactive theater, a science store, and food service facilities. The building is designed to evoke thoughts of a space station recently landed and partially sunken in the desert.
