

Great Lakes Science Center

Cleveland, Ohio

Architect for new building

Located on a spectacular 6.6-acre site at the edge of Lake Erie in Cleveland's North Coast Harbor, the centerpiece "gateway to the harbor" is the 90-foot high transparent winter garden. The 165,000-sq.ft. building houses 64,000 sq.ft. of indoor exhibits, more than 12,000 sq.ft. of outdoor exhibit terraces, an Interactive Theater, and a 320-seat IMAX dome theater.
